UI/UX Task Documentation

Project : Web and mobile screens

Name : Himasri Indugamelli

Overview

The goal of this task was to recreate three web-based UI screens and design their corresponding mobile versions.

Objective

- Recreate the given 3 web screens with google font "Manrope" and consistent layout.
 - Design equivalent mobile-friendly versions ensuring responsive adaptability.
 - Maintain visual hierarchy, accessibility and usability across screen sizes.
-

Objective

Figma - For responsive design layout

Iconify, Flat icons - For icons

Mockup plugin - For mobile mockups

Design Process

1. Understanding the screens

Carefully reviewed the structures and UI patterns of the three original screens.

2. Recreating the web screens

- Matched layout using consistent spacing, grid alignment and color theory.
- Ensured color palate and icons reflected the original style.
- Recreated bar charts, donut charts, and the analytics graphs with placeholder data using figma shapes and plugins.

3. Designing Mobile versions

- Translated each web screen into mobile layout using adaptive, responsive principles.
- Prioritized essential content on smaller screens.
- Converted side by side elements into stacked layouts for better readability on mobile.
- Optimized button size, font legibility and spacing for touch interactions.
